

Debugging Reactive Code

• Debugging reactive code within a *view* *king* Shiny application is not a trivial task

• To know the reactive state:

• Value

Dependencies//Invalidations

o.n.n.Overtime!!!

Solution:

reactlog!!

Debugging Reactive Code

- Debugging reactive code within a *working* Shiny application is **not a trivial task**
- To know the reactive state:
 - Value
 - Dependencies / Invalidations
 - ... Over time!!

Solution:
`reactlog!!`

What is `reactlog`?
